

Rapid Response Team Documentation

Rapid Response Team - MD/PA/NP and Nursing – 5/5/15

S	Rapid Response Protocols are not easily accessible within Cerner.
B	Currently the rapid response team (RRT) does receive automated alerts generated from CERNER to pagers and all three sites. The RRT, performs a patient assessment at bedside and begins interventions based on the protocol outlined in the sepsis immediate treatment plan.
A	Patients may develop life threatening infections which affect body homeostasis. Sepsis infections require rapid assessment, intervention and treatment utilizing the sepsis treatment protocol bundles.
R	Add a link to RRT's ad hoc form in CERNER to the policy outlining the goals and expectations of the rapid response team – accessible by right clicking in the box to the left of the red text and select “reference text.”
